

Division		
Foundation	Year 1	Year 2
<ul style="list-style-type: none"> Children count reliably with numbers from 1 to 20. They solve problems, including doubling, halving and sharing. 	<ul style="list-style-type: none"> solve simple one-step problems involving multiplication and division, calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. 	<ul style="list-style-type: none"> recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers. calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs. recognise and use the inverse relationship between multiplication and division in calculations. show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot. solve one-step problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.
<ul style="list-style-type: none"> Practical activities, songs and rhymes. E.g. 10 fat sausages.  <ul style="list-style-type: none"> Sharing during snack time by giving 1 each Is there an easier way of sharing a larger amount? E.g. 2 at a time. Making groups/piles of 2 Finding partners, e.g. in PE grouping in 2s, how many pairs are there? 1 ball for each pair, how many balls do I need to get out? 	<ul style="list-style-type: none"> Practical activities, songs, and games. Practice sharing and grouping using concrete manipulatives. Sharing – 6 sweets are shared between 2 people. How many do they have each?  Grouping – There are 6 sweets. How many people can have 2 each? (How many 2's make 6?)  Sharing related to fractions, e.g. cutting cakes, pizzas in half. Finding half of a group of objects  Knowing halves of even numbers to 20 Find simple fractions ($\frac{1}{2}$ or $\frac{1}{4}$) of objects, numbers, quantities and shapes. 	<ul style="list-style-type: none"> Continue to practice division by sharing and grouping – start with concrete manipulatives before moving on to pictorial representations.  Mo uses a number line to work out how many equal groups of 2 he can make from 12 Solve number sentences with \div and $=$ symbols (dividing by 2, 5 and 10), using their knowledge of the 2, 5 and 10 times tables. Begin to use other times table facts and derive related division facts. E.g. if $5 \times 4 = 20$ then $20 \div 4 = 5$. Understand that division is not commutative, e.g. $20 \div 4 \neq 4 \div 20$. Solve missing number problems, e.g. $6 \div 2 = \square$ $\square = 6 \div 2$ $6 \div \square = 3$ $3 = 6 \div \square$ Know that division is the inverse of multiplication. Recognise odd and even numbers. Use Numicon to explore odd and even numbers and the structure of these numbers. Relate division with fractions ($\frac{1}{2}$ or $\frac{1}{4}$). E.g. recognise that <i>find half of 12</i> means $12 \div 2$. Find fractions ($\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{2}$ or $\frac{3}{4}$) of objects, numbers, quantities and shapes.
